Studio Auto Clam Junior

It is the versatility of the Studio Auto Clam Junior Press that makes this machine so popular.

The automatic release mechanism will ease the production flow for the customer with high volume, whilst the clam action design of the machine will appeal to customers with low to medium volume production too!

The machine has an easy to use microprocessor controller for time and temperature accuracy, together with fingertip pressure control.

The Studio Auto Clam Junior Press has a work area of 40 x 40 cms (15.75 x 15.75 ins) and is produced in two versions, nominally 220 Volts for the European market and 110Volts for the American market.
